● British Library Cataloguing in Publication Data

Catalogue record for this book is available from the British Library

● ISBN: 978-3-89576-431-8

● EISBN: 978-3-89576-432-5

● EPUB: 978-3-89576-433-2

Prepress production: DMC | daverid.com

Printed in the Netherlands by Wilco

Elektor is part of EIM, the world's leading source of essential technical information and electronics products for pro engineers, electronics designers, and the companies seeking to engage them. Each day, our international team develops and delivers high-quality content - via a variety of media channels (e.g., magazines, video, digital media, and social media) in several languages - relating to electronics design and DIY electronics. www.elektor.com

Table of Contents

• Preface	6
Chapter 1 • Installing the Operating System on Raspberry Pi	12
1.1 • Overview	12
1.2 • Raspbian Buster installation steps on Raspberry Pi 4	12
1.3 • Using networked connection	15
1.4 • Remote access	17
1.5 • Using Putty	18
1.5.1 • Configuring Putty	19
1.6 • Remote access of the Desktop	20
1.7 • Static IP address	21
1.8 • Summary	24
Chapter 2 • Raspberry Pi Program Development	25
2.1 • Overview	25
2.2 • The nano text editor	25
2.3 • Example project	27
2.4 • Creating and running a Python program on Raspberry Pi	27
2.5 • Creating and running a C program on Raspberry Pi	34
2.6 • Summary	35
Chapter 3 • C Programming for Raspberry Pi	37
3.1 • Overview	37
3.2 • The C Language	37
3.2.1 • Variables	37
3.2.2 • Screen output and keyboard input	37
3.2.3 • Comparison	40
3.2.4 • Operators	40
3.2.5 • Auto increment/decrement operators	41
3.2.6 • Logical operators	41
3.2.7 • Flow control	41
3.2.8 • Arrays	55
3.2.9 • String variables	57
3.2.10 • Arithmetic functions	61
3.2.11 • String functions	63
3.2.12 • Character macros	67
3.2.13 • Alternative numeric input	69
3.2.14 • User functions	71
3.2.15 • File processing	78
3.2.16 • Structures	82

3.2.17 • Unions	85
3.2.18 • Pointers	88
3.3 • Summary	100
Chapter 4 • Hardware Programming using C	101
4.1 • Overview	101
4.2 • The general purpose input-output ports (GPIO)	101
4.3 • Interfacing with GPIO	102
4.3.1 • Loads requiring small currents	102
4.3.2 • Loads requiring higher currents	103
4.3.3 • Using relays	105
4.4 • Project 1: Flashing LED - compilers available	105
4.4.1 • Using the pigpio library	106
4.4.2 • Using the wiringPi library	107
4.4.3 • Other C libraries/compilers for Raspberry Pi	110
4.5 • Using the Geany editor	110
4.6 • The hardware	112
4.7 • Summary	113
Chapter 5 • Hardware Projects using C	114
5.1 • Overview	114
5.2 • Project 1 – Rotating LEDs	114
5.3 • Project 2 – Christmas lights	119
5.4 • Project 3 – Binary up counter with LEDs	125
5.5 • Project 4 – Binary up/down counter with LEDs	130
5.6 • Project 5 – LED dice	137
5.7 • Project 6 – LED colour wand	147
5.8 • Project 7 – Changing the brightness of an LED	152
5.9 • Project 8 – Generating random sounds using a buzzer	157
5.10 • Project 9 – Display temperature and relative humidity	160
5.11 • Project 10 – ON/OFF temperature controller	172
5.12 • Summary	179
Chapter 6 • LCD Projects	180
6.1 • Overview	180
6.2 • HD44780 LCD module	180
6.3 • Project 1 – Displaying text	182
6.4 • Project 2 – Second counter	186
6.5 • Project 3 – Creating a custom character	187
6.6 • Project 4 – Creating multiple custom characters	190
6.7 • Project 5 – Displaying current date and time	194
6.8 • Project 6 – Displaying the temperature and humidity	196
6.9 • Summary	200

Chapter 7 • I2C Bus Interface	201
7.1 • Overview	201
7.2 • The I2C Bus	201
7.3 • Project 1 – Port expander	203
7.4 • Project 2 – EEPROM memory	210
7.5 • Project 3 – TMP102 temperature display	216
7.6 • Project 4 – I2C LCD	223
7.7 • Project 5 – Using the pigpio library with I2C – TMP102 temperature display	237
7.8 • Summary	239
Chapter 8 • SPI Bus Interface	240
8.1 • Overview	240
8.2 • Raspberry Pi SPI pins	242
8.3 • Project 1 – Port expander	242
8.4 • Summary	252
Chapter 9 • Using Analogue to Digital Converters (ADCs)	253
9.1 • Overview	253
9.2 • Project 1 – Analogue temperature sensor thermometer	253
9.3 • Summary	260
Chapter 10 • Using Digital-to-Analogue Converters (DACs)	261
10.1 • Overview	261
10.2 • The MCP4921 DAC	261
10.3 • Project 1 - Generating square wave signal with any peak voltage	262
10.4 • Project 2 - Generating sawtooth wave signal	267
10.5 • Summary	271
Chapter 11 • Using Serial Communication	272
11.1 • Overview	272
11.2 • Raspberry Pi serial port	274
11.3 • Project 1 – Serial communication between Raspberry Pi and Arduino Uno	275
11.4 • Summary	282
Chapter 12 • Other Useful Functions wiringPi	283
12.1 • Overview	283
12.2 • Project 1 – Using external interrupts – event counter	283
12.3 • Project 2 – Using the tone library – generating 1kHz signal	287
12.4 • Project 3 – Using the tone library – sweep frequency tone generation	290
12.5 • Project 4 – Using the tone library – reading the frequency from the keyboard	291
12.6 • Project 5 – Using the tone library – melody maker	293
12.7 • Timing library	296
12.8 • Multitasking threads	296
12.9 • Project 6 – Multi-threading - flashing 3 LEDs at different rates	297
12.10 • Project 7 – Multi-threading – Two-digit 7-segment LED counter	300
12.11 • Hardware PWM	308
12.12 • GPIO utility	309

12.13 • Support for other chips and add-on boards	310
12.14 • Summary	310
Chapter 13 • Other Useful Functions - pigpio	311
13.1 • Overview	311
13.2 • Project 1 – Using external interrupts – event counter	311
13.3 • Timing	313
13.4 • Timer interrupts	314
13.5 • Project 2 – Using timer interrupts – flashing LED	315
13.6 • Project 3 – Using timer interrupts – 2 digit 7-segment LED counter	316
13.7 • Project 4 – Multi-threading - flashing 3 LEDs at different rates	319
13.8 • Project 5 – Hardware PWM- generate 1kHz PWM wave with hardware	322
13.9 • File handling	324
13.10 • Waves	324
13.11 • picoscope	324
13.12 • pigpiod	325
13.13 • Summary	325
Chapter 14 • Communication Over Wi-Fi	326
14.1 • Overview	326
14.2 • UDP and TCP/IP	326
14.3 • UDP communication	326
14.4 • Project 1 – Communicating with an Android smartphone using UDP (Raspberry Pi is the server)	327
14.5 • Project 2 – Sending temperature readings to Android smartphone (Raspberry Pi is the server)	331
14.6 • Project 3 – Communicating with an Android smartphone using UDP (Raspberry Pi is the client)	336
14.7 • Project 4 – Sending time-stamped temperature readings to Android smartphone . (Raspberry Pi is the server)	337
14.8 • Project 5 – Web Server application – controlling two LEDs	341
14.9 • Summary	349
Chapter 15 • Bluetooth Communication	350
15.1 • Overview	350
15.2 • Project 1 – Bluetooth communication with a smartphone – sending and receiving text messages	350
15.3 • Project 2 – Bluetooth communication with a smartphone – controlling two LEDs	354
Chapter 16 • Automatically Running Programs on Startup	358
16.1 • Overview	358
16.2 • Scheduling a program to run at specified times	358
Chapter 17 • Sending Data to the Cloud	366
17.1 • Overview	366
17.2 • Project – Sending temperature and humidity data to the cloud	366

• Index	374
